In 1638, a small book of no more than 92 pages in octavo was published “ appresso Gioanne Calleoni ” under the title “ Discourse on the State of the Jews and in particular those dwelling in the illustrious city of Venice. ” It was dedicated to the Doge of Venice and his counsellors, who are labelled “ lovers of Truth. ” The author of the book was a certain Simone (Sim a) Luzzatto, a native of Venice, where he lived and died,

serving as rabbi for over fifty years during the course of the seventeenth century. Luzzatto ' s political thesis is simple and, at the same time, temerarious, if not revolutionary: Venice can put an end to its political decline, he argues, by offering the Jews a monopoly on overseas commercial activity. This plan is highly recommendable because the Jews are “ wellsuited for trade, ” much more so than others (such as “ foreigners, ” for example). The rabbi opens his argument by recalling that trade and usury are the only occupations permitted to Jews. Within the confines of their historical situation, the Venetian Jews became particularly skilled at trade with partners from the Eastern Mediterranean countries. Luzzatto ' s argument is that this talent could be

put at the service of the Venetian government in order to maintain – or, more accurately, recover – its political importance as an intermediary between East and West. He was the first to define the role of the Jews on the basis of their economic and social functions, disregarding the classic categorisation of Judaism 's alleged privileged religious status in world history. Nonetheless, going beyond the socio-economic arguments of the book, it is essential to point out Luzzatto 's resort to sceptical strategies in order to plead in defence of the Venetian Jews. It is precisely his philosophical and political scepticism that makes Luzzatto 's texts so unique. This edition aims to grant access to his works and thought to English-speaking readers and scholars. approaching his texts from this point of view, the editors hope to open a new path in research into Jewish culture and philosophy that will enable other scholars to develop new directions and new perspectives, stressing the interpenetration between Jews and the surrounding Christian and secular cultures.

This book gives an overview of the crucial events that took place during the passage from the Ottoman to the Venetian rules in the Dalmatian hinterland during the Candian and Morean Wars in the second half of the 17th century. The hinterland of the capital city of the Venetian dual province of Dalmatia and Albania – the city of Zadar/Zara – has been used here as a case study to depict all the changes relating to: inhabitation,

the appearance of settlements, changes in the populations and migrations, the forms and models of administrative and political institutions, specific border economies and the development of Venetian border areas through trade with the Ottomans alongside agriculture in the contado. Studied here is how the city of Zadar, whose life was organised as a typical coastal community like many in the Venetian Republic along with its contado, managed to enlarge its territory and incorporate elements of Ottoman political, administrative and cultural heritage along with thousands of Ottoman Christian subjects.

Universities were driving forces of change in late Renaissance Italy. The Gonzaga, the ruling family of Mantua, had long supported scholarship and

dreamed of founding an institution of higher learning within the city. In the early seventeenth century they joined forces with the Jesuits, a powerful intellectual and religious force, to found one of the most innovative universities of the time. Paul F. Grendler provides the first book in any language about the Peaceful University of Mantua, its official name. He traces the efforts of Duke Ferdinando Gonzaga, a prince savant who debated Galileo, as he made his family's dream a reality. Ferdinando negotiated with the Jesuits, recruited professors, and financed the school. Grendler examines the motivations of the Gonzaga and the Jesuits in the establishment of a joint civic and Jesuit university. The University of Mantua lasted only six years, lost during the brutal sack of the city by

German troops in 1630. Despite its short life, the university offered original scholarship and teaching. It had the first professorship of chemistry more than 100 years before any other Italian university. The leading professor of medicine identified the symptoms of angina pectoris 140 years before an English scholar named the disease. The star law professor advanced new legal theories while secretly spying for James I of England. The Jesuits taught humanities, philosophy, and theology in ways both similar to and different from lay professors. A superlative study of education, politics, and culture in seventeenth-century Italy, this book reconsiders a period in Italy's history often characterized as one of feckless rulers and stagnant learning. research and a thorough examination of the published works of the university's professors, Grendler's history tells a new story. -- Kathleen Comerford, Georgia Southern University

This book investigates one concrete compounding pattern in present-day Italian within a larger overview of Italian compounding. Various accounts and classifications of Noun + Noun combinations in Italian are reviewed, with special focus on the status of the lexical integrity hypothesis. The author sets out to propose an integrated approach to the Noun + Noun compounding pattern, rigorously based on large representative data sets that were extracted from the Italian web corpus ItWaC as both automatically and

manually post-processed frequency lists. On the basis of such data, it is aimed to show the behaviour of various subtypes of Noun + Noun compounds. Starting out with the Bisetto-Scalise classification, the author carefully examines the status of coordinate compounds, ATAP compounds (i.e., the group comprising attributive and appositive structures) and subordinate compounds (comprising verbal-nexus and grounding compounds), discussing both theoretical and empirical implications of this classification scheme. Moreover, the original Bisetto-Scalise model is supplemented with further classification levels in order to capture specific compounding types such as relational (i.e. inherently trinominal) compounds. A major merit of the present study lies in the

quantitative dimension of the data it deals with. In light of this data, the author emphasizes the gradient nature of the traditional dichotomy between syntax and compounding. The book will thus appeal not only to the linguists interested specifically in Italian word-formation, but also to a larger community of scholars who seek a more general view of the word-formation phenomena.

The spatiotemporal conjunction is a fundamental aspect of the juridical reflection on the historicity of law. Despite the fact that it seems to

Read PDF 303 Posti Concorso Anas Quiz Svolti

represent an issue directly connected with the question of where legal history is heading today, it still has not been the object of a focused inquiry. Against this background, the book 's proposal consists in rethinking key confluences related to this problem in order to provide coordinates for a collective understanding and dialogue. The aim of this volume, however, is not to offer abstract methodological considerations, but rather to rely both on concrete studies, out of which a reflection on this conjunction emerges, as well as on the reconstruction of certain research lines featuring a spatiotemporal component. This analytical approach makes a contribution by providing some suggestions for the employment of space and time as coordinates for

legal history. Indeed, contrary to those historiographical attitudes reflecting a monistic conception of space and time (as well as a Eurocentric approach), the book emphasises the need for a delocalized global perspective. In general terms, the essays collected in this book intend to take into account the multiplicity of the spatiotemporal confines, the flexibility of those instruments that serve to create chronologies and scenarios, as well as certain processes of adaptation of law to different times and into different spaces. The spatiotemporal dynamism enables historians not only to detect new perspectives and dimensions in foregone themes, but also to achieve new and compelling interpretations of legal history. As far as the relationship between space and law is concerned, the book analyses experiences in

which space operates as a determining factor of law, e.g. in terms of a field of action for law. Moreover, it outlines the attempted scales of spatiality in order to develop legal historical research. With reference to the connection between time and law, the volume sketches the possibility of considering the factor of time, not just as a descriptive tool, but as an ascriptive moment (quasi an inner feature) of a legal problem, thus making it possible to appreciate the synchronic aspects of the 'juridical experience'. As a whole, the volume aims to present spatiotemporality as a challenge for legal history. Indeed, reassessing the value of the spatiotemporal coordinates for legal history implies thinking through both the thematic and methodological boundaries of the discipline."

Following the completion of the construction of new St. Peter's in the second decade of the seventeenth century, a series of monumental altarpieces was commissioned to decorate its altars. Here for the first time the altarpieces of St. Peter's are considered collectively, within the liturgical and artistic program of the building as a whole. Louise Rice takes a comprehensive approach to this critical chapter in the history of Italian Baroque art, offering insight into the mechanisms, motives, and meanings of papal patronage in the premier church of Catholicism.

of the field. History of mathematics education is treated in the book as a part of social history. This book grew out of the presentations delivered at the International Congress on Mathematics Education in Hamburg. Modern development and growing internationalization of mathematics education made it clear that many urgent questions benefit from a historical approach. The chapters present viewpoints from the following countries: Belgium, Brazil, Cambodia, China, Cyprus, Germany, Iceland, Italy, the Netherlands, Russia, Spain and Sweden. Each chapter represents significant directions of historical studies. The book is a valuable source for every historian of mathematics education and those interested in mathematics education and its development.
