Engine | Swiftune

Austin Motor Company's small straight-4 automobile engine, the A series, is one of the most common in the world [citation needed]. Launched in 1951 with the Austin A30, production lasted until 2000 in the Mini. It used a cast-iron block and cylinder head, and a steel crankshaft with 3 main bearings. The camshaft ran in the cylinder block, driven by a single-row chain for most applications, and ...

BMC A-series engine - Wikipedia

When the Mini was first conceived it utilised a de-stroked version of the then quite remarkable 948cc A-series engine. The 948 was itself a development of the very first A-series engine used initially to power the A30 in 1952 and the redoubtable Morris Minor in 1953 - an 803cc job (2.28-in/57.91mm bore, 3.0-in/76.2mm stroke giving a bore to
