Your Bionaire™ Air Purifier includes a particle sensor that measures indoor air quality. When set to auto mode, it automatically adjusts the fan speed to cycle between 1, 2 and 3 speed to provide optimum filtration based on air particulate concentration. It also helps conserve energy by only operating the fan at higher speeds when needed. IONIZER

Monthly magazine devoted to topics of general scientific interest.

In *Diversity, Crime, and Justice in Canada* hate-crime specialist Barbara Perry brings together 17 of the country's leading scholars to address issues of inequality as they intersect with crime and social justice. Students will discover how collective identities - not just of race, class, and gender, but of religion, ability, sexuality, age - play a crucial part in determining the nature of an individual's encounter with the criminal justice system. Integrating themes of history and context, power and powerlessness, and social and political action throughout, the text examines the concept of difference, the specific issues that different groups face with respect to the justice system, and the kinds of reform necessary to mitigate inequalities. Thoroughly updated throughout, the second edition includes new pedagogical features that immerse students in the practicalities of criminal and social justice. The "Making a Difference" activity at the end of each chapter encourages students to create social change, and the new "Case Study" boxes explore a range of current and historical cases. The addition of a striking new visual program ensures that the second edition of *Diversity, Crime, and Justice in Canada* will be an invaluable resource for any course that examines social inequality in relation to the Canadian criminal justice system.

New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

We revisit Lipset ' s law, which posits a positive and significant relationship between income and democracy. Using dynamic and heterogeneous panel data estimation techniques, we find a significant and negative relationship between income and democracy: higher/lower incomes per capita hinder/trigger democratization. Decomposing overall income per capita into its resource and non-resource components, we find that the coefficient on the latter is positive and significant while that on the former is significant but negative, indicating that the role of resource income is central to the result.
