Hi.

Can anyone point me to a comprehensive marine engine parts dealer? My BMW 12D diesel engine (in a yacht) has an irreparable corroded cylinder, and I can't seem to source parts for such an old engine (1985) in Australia. Any links (anywhere in the world I guess) appreciated, in addition to the BMW company in Germany. Thanks.

Nigel Calder, a diesel mechanic for more than 25 years, is also a boatbuilder, cabinetmaker, and machinist. He and his wife built their own cruising sailboat, Nada, a project they completed in 1984. Calder is author of numerous articles for Yachting Monthly and many other magazines worldwide, as well as the bestselling Boatowner's Practical and Technical Cruising Manual and Boatowner's Mechanical and Electrical Manual, both published by Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively illustrated guide will enable the reader to be their own diesel mechanic. As Nigel Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the knowledge to spot early warning signs of impending trouble, and to have the ability to correct small ones before they become large ones.'

This is a study of the experience of one of Germany's most important armaments manufacturers - and automotive companies - during the period of the Third Reich. The book examines how the opportunities offered by the Nazi rearmament in the 1930s led to rapid expansion and a surge in profits.
