Book 1 of the Desert Roses series. Working as a Harvey Girl at the luxury resort of El Tovar, located on the south rim of the Grand Canyon, Alexandra Keegan feels she is in a dream come true. But when her father's indiscretions come to light and her mother is suspected of murder, Alex finds herself the center of some unwelcome attention. Will she soon find herself alone in the world?

More than 100,000 copies sold in its first 2 editions; Over 93,000 students enrolled; Translated into 12 languages; Corresponds to standard college economics courses; Use with most macroeconomics texts; Includes a new chapter on economic growth.

Although the basic principles of lasers have remained unchanged in the past 20 years, there has been a shift in the kinds of lasers generating interest. Providing a comprehensive introduction to the operating principles and applications of lasers, this second edition of the classic book on the subject reveals the latest developments and applications of lasers. Placing more emphasis on applications of lasers and on optical physics, the book's self-contained discussions will appeal to physicists, chemists, optical scientists, engineers, and advanced undergraduate students.

There are many insights and nuggets of value in this collection. Maurice Lipsedge reminds us how badly psychiatry needs anthropology's insights. This book should contribute to the ongoing dialogue between

the two fields.' - The Journal of the Royal Anthropological Institute 'The editors states in the introduction that they wish to encourage the reader 'to meet halfway the other discipline'. This expresses the view which all the contributors clearly feel and which is correct, that psychology and psychiatry and anthropology have much to offer each other and indeed are similar in several respects'. - The International Journal of Social Psychiatry 'As an introductory text the book is perhaps too difficult, but for students of medical anthropology and cross-cultural psychiatry it offers a useful up to date assessment of the field.' - The International Journal of Social Psychiatry 'This text brings together some noted clinicians and researchers in psychiatry and mental health. The aim is to explore what we can learn from anthropology to achieve a contextual understanding of mental illness and health in contemporary society. The book contains a wide selection of ideas, and works well to bridge the gap between anthropolgy and psychiatry. This book is definitely not for the novice or anyone new to the field. It is, however, worth reading to explore ways in which mental health practitioners can make the shift from ideologies, theories and practices that are only interested in establishing the presence or absence of pathology or illness, towards theory and practice that take account of the meaning of those experiences for people in their everyday lives. One of the authors sums this up well by suggesting that "anthropologically informed methods of enquiry have potential to help establish clearer links between personal suffering and local politico-economic ideologies".` - Openmind, No110, July/Aug 2001 The

relevance of transcultural issues for medical practice, including psychiatry, is becoming more widely recognized and medical anthropology is now a major sub-discipline. Written for those working in the mental health services as well as for anthropologists, *Anthropological Approaches to Psychological Medicine* brings together psychiatry and anthropology and focuses on the implications of their interaction in theory and clinical practice. The book reaffirms the importance of anthropology for fully understanding psychiatric practice and psychological disorders in both socio-historical and individual contexts. The development and use of diagnostic categories, the nature of expressed emotion within cross-cultural contexts and the religious context of perceptions of pathological behaviour are all refracted through an anthropological perspective. The clinical applications of medical anthropology addressed include, in particular, the establishing of cultural competence and an examination of the new perspectives anthropological study can bring to psychosis and depression. The stigmatization of mental illness is also reviewed from an anthropological perspective. Encouraging practitioners to reflect on the position of medicine in a wider cultural context, this is an exciting and comprehensive text which explores the profound importance of an anthropological interpretation for key issues in psychological medicine.

Includes standards covering the critical program areas for effective institutional management, including safety procedures, security, rules and discipline, staff development, physical plant, and health care

services.

The very short prequel to Tessa's Pride by Olivia Brynn Cowgirl Tessa McCade has a rare day off from Bradley Equine Ranch, and she's got a plan. She mounts her favorite horse to ride to a secluded spot on the Montana horse ranch with a book, a snack, and a towel for skinny-dipping. When her boss—Joshua Bradley himself—joins her, Tessa knows it will take all her strength to keep her feelings for the man at bay. If there's one thing Tessa didn't plan on today, it's Josh's surprising admission. *Bonus! Includes the first two chapters of Tessa's Pride!*

Combines card-making techniques with origami-inspired folds to create beautiful, handmade cards that unfold, expand, fan out, pop up, and even hold hidden messages for fun, personal greetings for any occasion. Original.

The study of carbonic anhydrase has spanned multiple generations of scientists. Carbonic anhydrase was first discovered in 1932 by Meldrum and Roughton. Inhibition by sulfanilamide was shown in 1940 by Mann and Keilin. Even Hans Krebs contributed to early studies with a paper in 1948 showing the relationship of 25 different sulfonamides to CA inhibition. It was he who pointed out the importance of both the charged and uncharged character of these compounds for physiological experiments. The field of study that focuses on carbonic anhydrase (CA) has exploded in recent years with the identification of new families and isoforms. The CAs are metalloenzymes which are comprised of

5 structurally different families: the alpha, beta, gamma, and delta, and epsilon classes. The alpha class is found primarily in animals with several isoforms associated with human disease. The beta CAs are expressed primarily in plants and are the most divergent. The gamma CAs are the most ancient. These are structurally related to the beta CAs, but have a mechanism more similar to the alpha CAs. The delta CAs are found in marine algae and dinoflagellates. The epsilon class is found in prokaryotes in which it is part of the carboxysome shell perhaps supplying RuBisCO with CO₂ for carbon fixation. With the excitement surrounding the discovery of disease-related CAs, scientists have redoubled their efforts to better understand structure-function relationships, to design high affinity, isotype-specific inhibitors, and to delineate signaling systems that play regulatory roles over expression and activity. We have designed the book to cover basic information of mechanism, structure, and function of the CA families. The authors included in this book bring to light the newest data with regard to the role of CA in physiology and pathology, across phylums, and in unique environmental niches.

Korean: A Comprehensive Grammar is a reference to Korean grammar, and presents a thorough overview of the language, concentrating on the real patterns of use in modern Korean. The book moves from the alphabet and pronunciation through morphology and word classes to a detailed analysis of sentence structures and semantic features such as aspect, tense, speech styles and negation. Updated and revised, this new edition includes lively descriptions of
