Make sure you're using the correct starting procedure. For example, the procedure for starting a Homelite UT80432, which uses a Honda GVC190 engine, is to turn the fuel valve on and pull out the choke before pulling the starting rope. Once the engine is running, you must push the choke back in or the engine will sputter and die.

To change the oil in your Honda engine, start it up and let it run long enough to warm the oil to ensure it will flow smoothly when drained. Turn the engine off, and place a shallow bucket or drain pan beneath the drain plug on the engine. Remove the drain plug and the oil filler cap to allow good oil flow, and allow the oil to drain into the pan.
