Personally, I like the manual control board vs the digital one but that's just me. I bought mine used last year. I stole it for \$1000. Even if I replaced every wear part in this stove, it would still be half the price of a new one. ... I'm looking at the Enviro Meridian Cast Iron, although I'd like to also look at the Enviro M55 Cast Iron.

Since the publication of the first edition in 2004, advances in mobile devices, positioning sensors, WiFi fingerprinting, and wireless communications, among others, have paved the way for developing new and advanced location-based services (LBSs). This second edition provides up-to-date information on LBSs, including WiFi fingerprinting, mobile computing, geospatial clouds, geospatial data mining, location privacy, and location-based social networking. It also includes new chapters on application areas such as LBSs for public health, indoor navigation, and advertising. In addition, the chapter on remote sensing has been revised to address advancements.

The first book-length critical and historical account of an ultramodern architectural movement of the 1960s that advocated "living equipment" instead of buildings. In the 1960s, the architects of Britain's Archigram group and Archigram magazine turned away from conventional architecture to propose cities that move and houses worn like suits of clothes. In drawings inspired by pop art and psychedelia, architecture floated away, tethered by wires, gantries, tubes, and trucks. In Archigram: Architecture without Architecture, Simon Sadler argues that Archigram's sense of fun takes its place beside the other

cultural agitants of the 1960s, originating attitudes and techniques that became standard for architects rethinking social space and building technology. The Archigram style was assembled from the Apollo missions, constructivism, biology, manufacturing, electronics, and popular culture, inspiring an architectural movement—High Tech—and influencing the postmodern and deconstructivist trends of the late twentieth century. Although most Archigram projects were at the limits of possibility and remained unbuilt, the six architects at the center of the movement, Warren Chalk, Peter Cook, Dennis Crompton, David Greene, Ron Herron, and Michael Webb, became a focal point for the architectural avant-garde, because they redefined the purpose of architecture. Countering the habitual building practice of setting walls and spaces in place, Archigram architects wanted to provide the equipment for amplified living, and they welcomed any cultural rearrangements that would ensue. Archigram: Architecture without Architecture—the first full-length critical and historical account of the Archigram phenomenon—traces Archigram from its rediscovery of early modernist verve through its courting of students, to its ascent to international notoriety for advocating the "disappearance of architecture."

The title Archigram came from the notion of a more simple and urgent item than a Journal, like a telegram or aerogramme - hence, "archi(tecture)-gram."".
