Ronald H. Coase, one of the most innovative and provocative economists of the twentieth century, has had a lasting influence in economics, law and economics, organization theory, management and political science. In this comprehensive Companion, 31 leading economists, social scientists and legal scholars, including two Nobel Laureates, offer the first global assessment of the initial impact of Coase ' s work and the continuing inspiration that researchers and policy makers find in his contributions. The book presents a review of the continuing power of Coase ' s work, including the reshaping of public policies with particular respect to public utilities and network industries. Further chapters explore research programmes that he initiated including the concept of transaction costs and the analysis of property rights, especially in terms of the regulation of the communications industry and the creation of markets for the right to pollute. The book clearly demonstrates the originality of Coase ' s work and the challenge that it posed to conventional perspectives which has been a hallmark of his research throughout his life, from his initial view on the nature of the firm to his recent analysis of the development of capitalism in China. Less well-known features of Coase ' s research going beyond his famous papers on ' The Nature of the Firm ' and ' The Problem of Social Cost ' are also explored in detail. From economics to public policy, this complete and thorough assessment of Coase ' s vast contribution will be an invaluable reference to all those interested in the many areas influenced by this great economist.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

The Fisher Body Craftsman ' s Guild was a national auto design competition sponsored by the Fisher Body Division of General Motors. This competition was for teenagers to compete for college scholarships by designing and building scale model " dream " cars. Held from the 1930s through the 1960s, it helped identify and nurture a whole generation of designers and design executives. Virgil M. Exner, Jr., Charles M. Jordan, Robert W. Henderson, Robert A. Cadaret, Richard Arbib, Elia ' Russ ' Russinoff, Galen Wickersham, Ronald C. Hill, Edward F. Taylor, George R. Chartier, Charles W. Pelly, Gary Graham, Charles A. Gibilterra, E. Arthur Russell, William A. Moore, Terry R. Henline, Paul Tatseos, Allen T. Weideman, Kenneth J. Dowd, Stuart Shuster, John M. Mellberg, Harry E. Schoepf, and Ronald J. Will, are among those designers and design executives who participated in the Guild. The book also describes many aspects of the miniature model Napoleonic Coach and other scale model cars the students designed.

This classic study of the American working class, originally published in 1973, is now back in print with a new introduction and epilogue by the author. An innovative blend of first-person experience and original scholarship, Aronowitz traces the historical development of the American working class from post-Civil War times and shows why radical movements have failed to overcome the forces that tend to divide groups of workers from one another. The rise of labor unions is analyzed, as well as their decline as a force for social change. Aronowitz ' s new introduction situates the book in the context of developments in current scholarship and the epilogue discusses the effects of recent economic and political changes in the American labor movement.
