The Chevrolet small-block engine is a series of V8 automobile engines used in normal production by the Chevrolet division of General Motors between 1954 and 2003, using the same basic engine block.Referred to as a "small-block" for its comparative size relative to the physically much larger Chevrolet big-block engines, The small block family spanned from 262 cu in (4.3 L) to 400 cu in (6.6 L ...

Chevrolet small-block engine - Wikipedia

The Oldsmobile V8, also referred to as the Rocket, is series of engines that was produced by Oldsmobile beginning in 1949. The Rocket, along with the 1949 Cadillac V8, were the first post-war OHV crossflow cylinder head V8 engines produced by General Motors.Like all other GM divisions, Olds continued building its own V8 engine family for decades, adopting the corporate Chevrolet 350 small ...

Oldsmobile V8 engine - Wikipedia

A 307 is just another 5.0L, as in it's about 0.7L or 12% less than a 350 in every way. With good heads and a streetable cam and rpm limit and you're looking at 300-350 hp and 300-350 lb-ft of torque. Look for good heads that fit a 305 (ie. things with 1.94" intake valves) and you'll do well.

307 good, bad, or ugly ... - Chevy Message Forum ...

307. The 307 was the last of the Generation I small blocks that link back to the original motors of the mid-1950s. Produced from 1968 to 1972 it utilized the same 3.875 bore as the very first Chevy small block, but with a wider journals to accept the 327 crankshaft. It was used widely in the Chevy II / Nova and Chevelle models. 302

A Guide to Every Small Block Ever Offered in a Car by Chevy

The 307 was built from 1980 through 1990, produced from 140hp to 180hp, and was installed in just about every car Olds built in that period at one time or another, including the Cutlass/442, Delta 88's, 98's and Toronados. It was also used in many Buick, Pontiac, Cadillac and Chevy models.

Olds FAQ -- 307 CID Engine Detail

An all-new, more efficient supercharger on the LT5 is based on the same effective four-lobe design as the LS9 and LT4 air compressors, but it is larger. At 2.65 liters of displacement, it is 64 percent larger than the LT4 ' s 1.7-liter compressor and pumps out more boost.
