"You can be lonely anywhere, but there is a particular flavor to the loneliness that comes from living in a city, surrounded by thousands of strangers. The Lonely City is a roving cultural history of urban loneliness, centered on the ultimate city: Manhattan, that teeming island of gneiss, concrete, and glass. What does it mean to be lonely? How do we live, if we're not intimately involved with another human being? How do we connect with other people, particularly if our sexuality or physical body is considered deviant or damaged? Does technology draw us closer together or trap us behind screens? Olivia Laing explores these questions by travelling deep into the work and lives of some of the century's most original artists, among them Andy Warhol, David Wojnarowicz, Edward Hopper, Henry Darger and Klaus Nomi. Part memoir, part biography, part dazzling work of cultural criticism, The Lonely City is not just a map, but a celebration of the state of loneliness. It's a voyage out to a strange and sometimes lovely island, adrift from the larger continent of human experience, but visited by many - millions, say - of souls"--

In what ways do the artistic avant-garde's representations of the human body reflect the catastrophe of World War I? The European modernists were inspired by developments in the nineteenth-century, yielding new forms of knowledge about the nature of reality and repositioning the human body as the new 'object' of knowledge. New 'visions' of the human subject were created within this transformation. However, modernity's reactionary political climate - for which World War I provided a catalyst - transformed a once liberal ideal between humanity, environment, and technology, into a tool of disciplinary rationalisation. Visions of the Human considers the consequences of this historical moment for the twentieth and twenty-first centuries. It explores the ways in which the 'technologies of the self' that inspired the avant-garde were increasingly instrumentalised by conservative politics, urbanism, consumer capitalism and the society of 'the spectacle'. This is an engaging and powerful study which challenges prior ideas and explores new ways of thinking about modern visual culture.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State--and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years--it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt
