Orthodontics is both art and science. The art is more human, while science is more machine. As I have suggested before, our future is not so much human vs. machine, but human enhanced by machine. Like many areas of life, a good balance of both acts helps to design a model that gains in efficiency AND experience.

The speciality of orthodontia has evolved over the years in terms of material science, technology, treatment efficient, precision engineering and other related aspects. Conventional wisdom in business world says that to grow, you have to first sustain, explore the options and then expand. The same notion holds true for orthodontic clinical practice as well. Nevertheless, practice governance and management are the least explored entities amongst the orthodontists with basic knowledge in information technology, behavioral management, finance & taxation, law & litigation and professional ethics, it is conceivable to manage and maintain an orthodontic practice that is self-sustainable and can be seen as professional model for other specialities.
