Capitalism is an economic system based on the principle that private citizens or corporations have the freedom to own, distribute and control the factors of production in a society as opposed to the state. In other words, capitalism is a concept that emphasizes the private ownership of the means of production (Streeck, 2011).

3) Capitalism leads to innovation: Coming up with new products is often time consuming, expensive and hit or miss. Nine ideas may fail before that tenth one takes off. The less the creative people behind these ideas are allowed to benefit, the less time, money and effort they 'll put into developing new concepts and inventions.
