Crashing is the easy part. Book One of the Citadel Series It's been more than a century since humanity escaped the overpopulation of Earth, expanding out among the stars. We've faced and overcome war with an alien race. We've survived terrorist attacks meant to end colonization. We've thrived despite unregulated class distinctions, separating the wealthy from the working class. What comes next may be the end of it all. A lone colony of human castaways, led by a former alien enemy, find themselves at the mercy of a saboteur and a plot to end humanity's unrestricted travel among the stars. This could be the finale of the colonies and the end of a species. Everything depends on how smart - and how forgiving - humanity can actually be. "This series is like LOST meets Andy Weir's 'The Martian.' Funny. Action packed. Full of mystery and packed with characters you love from page one." "Groundbreaking work, ready for the science fiction hall of fame!" Praise for Citadel: First Colony "There was something so fascinating about this story and the cast of characters he put together." - Leah Petersen, Author of "Fighting Gravity" "This well written science fiction story will capture your interest on page one and won't let go until you finish. The characters are mysterious, fascinating, and likable. - James Chalk, Author of "Meat Market" "Tumlinson managed to inject quirkiness and humor that was both unexpected and gave the characters even more depth." - JoAnn Takasaki, Author of "Luau Like a Local: The Easy Way" "It has all the humor, complexity and charm of books by Andy Weir and Hugh Howey — a rich scifi landscape that constantly surprises and keeps you turning page after page."

An early American textbook for beginning readers, that includes a rhyming alphabet, Bible questions, and Shorter Catechism, with original woodcut illustrations.

A smart and funny book by a prominent Harvard psychologist, which uses groundbreaking research and (often hilarious) anecdotes to show us why we're so lousy at predicting what will make us happy – and what we can do about it. Most of us spend our lives steering ourselves toward the best of all possible futures, only to find that tomorrow rarely turns out as we had expected. Why? As Harvard psychologist Daniel Gilbert explains, when people try to imagine what the future will hold, they make some basic and consistent mistakes. Just as memory plays tricks on us when we try to look backward in time, so does imagination play tricks when we try to look forward. Using cutting-edge research, much of it original, Gilbert shakes, cajoles, persuades, tricks and jokes us into accepting the fact that happiness is not really what or where we thought it was. Among the unexpected questions he poses: Why are conjoined twins no less happy than the general population? When you go out to eat, is it better to order your favourite dish every time, or to try something new? If Ingrid Bergman hadn't gotten on the plane at the end of Casablanca, would she and Bogey have been better off? Smart, witty, accessible and laugh-out-loud funny, Stumbling on Happiness brilliantly describes all that science has to tell us about the uniquely human ability to envision the future, and how likely we are to enjoy it when we get there.

Bringing in the harvest. Watching for enemy aircraft. Rescuing survivors from the wreckage of bombed houses. Keeping the family business running when parents were enlisted into war-work. These are just a few examples of how children and young people made substantial contributions to the war effort during the Second World War. You Can Help Your Country: English children's work during the Second World War reveals the remarkable, hidden history of children as social agents who actively participated in a national effort during a period of crisis. This highly-illustrated volume draws on interviews with people who were school-age during the war, on archives and on school histories which recorded wartime activities as well as children's accounts of their experiences at the time. Children expressed both positive and negative views of their work: exhilaration and exhaustion, pride and resentment, delight in new freedoms and anger at deprivation. Applying a sociological approach, the authors outline the social history of childhood during the first half of the twentieth century, documenting heated debates about the 'proper' activities of children and analysing the thinking that questioned class-based childhoods and schooling and promoted better health and better educational opportunities. In this context, they examine how children responded to appeals to 'do their bit' as urged through government poster campaigns, BBC radio broadcast programmes for schools, propaganda films and children's fiction. This is a stimulating, entertaining and scholarly contribution to the history of childhood, which will enable the reader to think about ideas of childhood today and their rights, as citizens, to participate in the social and political life of their society. It will be essential reading for

academics, researchers and students in the field of educational sociology and more widely, and will appeal to anyone with an interest in social history and war studies.

As a director, writer, and producer, Christopher Nolan has substantially impacted contemporary cinema through avant garde films, such as *Following* and *Memento*, and his contribution to wider pop culture with his Dark Knight trilogy. His latest film, *Interstellar*, delivered the same visual qualities and complex, thought-provoking plotlines his audience anticipates. *The Philosophy of Christopher Nolan* collects sixteen essays, written by professional philosophers and film theorists, discussing themes such as self-identity and self-destruction, moral choice and moral doubt, the nature of truth and its value, whether we can trust our perceptions of what's "real," the political psychology of heroes and villains, and what it means to be a "viewer" of Nolan's films. Whether his protagonists are squashing themselves like a bug, struggling to create an identity and moral purpose for themselves, suffering from their own duplicitous plots, donning a mask that both strikes fear and reveals their true nature, or having to weigh the lives of those they love against the greater good, there are no simple solutions to the questions Nolan's films provoke; exploring these questions yields its own reward.

Businesses today want actionable insights into their data—they want their data to reveal itself to them in a natural and user-friendly form. What could be more natural than human language? Natural-language search is at the center of a storm of ever-increasing web-driven demand for human-computer communication and information access. SQL Server 2008 provides the tools to take advantage of the features of its built-in enterprise-level natural-language search engine in the form of integrated full-text search (iFTS). iFTS uses text-aware relational queries to provide your users with fast access to content. Whether you want to set up an enterprise-wide Internet or intranet search engine or create less ambitious natural-language search applications, this book will teach you how to get the most out of SQL Server 2008 iFTS: Introducing powerful iFTS features in SQL Server, such as the FREETEXT and CONTAINS predicates, custom thesauruses, and stop lists Showing you how to optimize full-text query performance through features like full-text indexes and iFilters Providing examples that help you understand and apply the power of iFTS in your daily projects

Examines the author's philosophy of "forest gardening", involving a holistic approach encompassing health issues, spirituality, and environmental concerns

Includes photographs, summaries of each Dirk Pitt novel, an interview with Cussler, and Dirk Pitt trivia questions

FOOD ETHICS, 2E explores the ethical choices we make each time we eat. With twenty-six readings that bring together a diverse group of voices, this textbook dives into issues such as genetically modified foods, animal rights, population and consumption, the food industry's impact on pollution, centralized versus localized production, and more. In addition, this edition includes new introduction, new readings, a comprehensive index, and study questions that frame these significant issues for discussion and reflection.
