Fittingly, the Act's chief sponsors were a Senator from Nevada, Key Pittman, and a Representative from Virginia, A. Willis Robertson. The Pittman-Robertson Act, as it came to be called, sped through Congress and was signed into law by President Franklin Roosevelt on September 2, 1937. From a modest beginning, the Pittman-Robertson program has grown with the economy and the human population of our country. By now it has channeled nearly \$1.7 billion in Federal excise tax receipts, augmented by some \$600 million from the States, into activities to restore wildlife. The projects include State acquisition of acreage needed to bring wildlife back, research into wildlife requirements and problems, active management of habitats, and development of scientific ways to enable wildlife and people to share our land in harmony. The program has strengthened State governments and built wildlife management into a respected profession.

The Kurds, one of the oldest ethnic groups in the Middle East, are reasserting their identity—politically and through violence. Divided mainly among Turkey, Iran, Iraq, and Syria, the Kurds have posed increasingly sharp challenges to all of these states in their quest for greater autonomy if not outright independence. Turkey's essentially democratic structure and civil society\_ideal tools for coping with and incorporating minority challenge\_have so far been suspended on this issue, which the government is treating almost exclusively as a security problem to be dealt with by force. For the West the situation in Turkey is particularly significant because of the country's importance in the region and because of the economic, political, and diplomatic damage that the conflict has caused. If Turkey fails to find a peaceful solution within its current borders, then the outlook is grim for ethnic and separatist challenges elsewhere in the region. This study explores the roots, dimensions, character, and evolution of the problem, offers a range of approaches to a resolution of the conflict, and draws broader parallels between the Kurdish question and other separatist movements worldwide.

Exercises and Solutions in Statistical Theory helps students and scientists obtain an in-depth understanding of statistical theory by working on and reviewing solutions to interesting and challenging exercises of practical importance. Unlike similar books, this text incorporates many exercises that apply to real-world settings and provides much more thorough solutions. The exercises and selected detailed solutions cover from basic probability theory through to the theory of statistical inference. Many of the exercises deal with important, real-life scenarios in areas such as medicine, epidemiology, actuarial science, social science, engineering, physics, chemistry, biology, environmental health, and sports. Several exercises illustrate the utility of study design strategies, sampling from finite populations, maximum likelihood, asymptotic theory, latent class analysis, conditional inference, regression analysis, generalized linear models, Bayesian analysis, and other statistical topics. The book also contains references to published books and articles that offer more information about the statistical concepts. Designed as a supplement for advanced undergraduate and graduate courses, this text is a valuable source of classroom examples, homework problems, and examination questions. It is also useful for scientists interested in enhancing or refreshing their theoretical statistical skills. The book improves readers' comprehension of the

principles of statistical theory and helps them see how the principles can be used in practice. By mastering the theoretical statistical strategies necessary to solve the exercises, readers will be prepared to successfully study even higher-level statistical theory.

Turkey's involvement in the Gulf War in 1991 paved the way for the country's acceptance into the European Union. This book traces that process and in the first part looks at Turkey's foreign policy in the 1990s, considering the ability of the country to withstand the repercussions of the fall of communism. It focuses on Turkey's achievement in halting and minimising the effects of the temporary devaluation in its strategic importance that resulted from the waning of the Cold War and the disintegration of the Soviet Union, the skilful way in which Turkey avoided becoming embroiled in the ethnic upheavals in Central Asia, the Balkans and the Middle East, and the development of a continued policy of closer integration into the European and western worlds. Internal politics are the focus of the second part of the book, addressing the curbing of the Kurdish revolt, the economic gains made, and the strengthening of civil society. Nachmani goes on to analyse the prospects for Turkey in the twenty-first century, in the light of the possible integration into Europe, which may leave the country's leadership free to deal effectively with domestic issues. This book will make crucial reading for anyone studying Turkish politics, or indeed European or European Union politics.
